Message

At the very outset, I would like to express my heartfelt gratitude to all my colleagues of General Council, Officers, staff of MAC, organizations and the people of MAC area for their generous support to MAC.

Despite our best spirit and efforts, we could not achieve our target as we hoped and visualized due to various reasons. We initiated a livelihood and skill development mission of our own. But peoples' reluctance to accept new scientific skills in livelihood sector in the name of tradition stood as the biggest hurdle. We had to struggle hard. Now I am happy that the tradition specific mindset is changing and our efforts of training on scientific Fish Farming, Piggery, Rubber Plantation, Banana and Sugarcane cultivation, Weaving etc. are bearing fruits.

Secondly, due to cut in fund allocated fund during 2014-15 and 2015-16, we had to reduce the number of schemes and beneficiaries up to 50 %. This compulsion tremendously affected the volume of work in 2014-15 and 2015-16.

Thirdly, delay in releasing fund to MAC during the previous years badly affected completion of schemes on time. It is observed that, by the time fund is released the rainy season starts. As the communication system in MAC area is very poor and sites of schemes are very remote, it becomes almost impossible to transport materials to construction site during monsoon. This disruption in transportation hampers the progress of work.

Another problem MAC is struggling to overcome is in running the administration with deputed officers. As all officers are holding different posts in their respective departments, they do not have sufficient time to deal with the works of MAC. However, the present Govt. is taking some concrete steps in resolving the shortage of staff issue of the Councils.

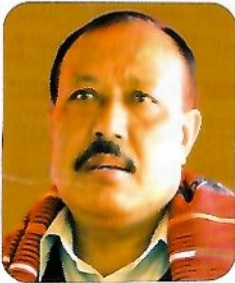

Despite all these problems, MAC team under the leadership of CEC, Dr. Ranoj Pegu, MAC has established a responsive, transparent, committed pro-people governance with a new vision of economic transformation.

We have appealed the new state government to resolve the problems mentioned above. The achievements mostly depend upon how the state govt. responses. We hope that new govt. of Assam under the leadership of hon'ble Chief Minister Sri Sarbananda Sonowal, will play a positive role under the spirit of 'SABKA SATH, SABKA BIKASH', the great vision framed by hon'ble Prime Minister of India Sri Narendra Modiji.

Once again, I take this opportunity to appeal all stake holders to extend emotional, intellectual, physical and financial support to make MAC more vibrant in the greater interest of Assam and India. Thank you.

(PARAMANANDA CHAYENGIA)

The Hon'ble Chairman of MAC, Gogamukh

Message

The last two financial years (FY-2014-15 and 2015-16) were gloomy for Mising Autonomous Council as the Council did not receive what the state budget allocated under plan fund. The budget allocation to MAC during FY - 2014-15 and 2015-16 were Rs. 5852.00 lakhs and Rs. 6437.00 lakhs respectively which were duly processed and sanctioned by Govt. of Assam. But, at the time of releasing the fund, the Govt. released only 50% of the amount i.e. Rs. 2926.00 lakhs and Rs. 3286.48 lakhs only. This created a terrible pecuniary crisis ramifying into adverse political and social issues. The Council was plunged into a situation of managing all its commitment with half the amount. That was impossible; but we had to make it possible. And we did it – with pain and anguish, and by begging pardons from people for failed commitments.

In 2016, a new Government came to power in Assam and it brought good news to Mising Autonomous Council as the new Chief Minister Shri Sarbananda Sonowal announced that the Autonomous Council would get justice with fund allocation proportionate to the population and that fund to the Council would be released on time. Accordingly, Rs. 11725.00 lakhs was released to MAC making up the lapses of two previous years. Dr. Himanta Biswa Sarmah, the hon'ble Finance Minister visited the Council headquarters, took stock of the financial position and works of the Council and it was directly under his bold initiative that we could get an amount making up the lapses of the previous years.

I thank hon'ble Chief Minister Shri Sarbananda Sonowal, Finance Minister Dr. Himanta Biswa Sarmah and Minister of WPT&BC Smti Pramila Rani Brahma for being kind and proactive in approving the Council budget and releasing the budget allocated fund on time.

Unlike the days of the Council under govt. nominated ad-hoc bodies when most of the fund of MAC were spent for purchasing various items for distribution among beneficiaries the elected Council since 2013 has been spending more than 70% fund for infrastructure building and only about 10% fund for procurement. During the financial year of 2016-17, the Council utilized 77% of its plan fund for infrastructure development – like construction of roads, culverts, school building & boundary wall, highland flood shelter, bundhs & embankments etc.

I can confidently say that MAC has been functioning transparently with definite targets of transformation. This Annual Report is a testimony to our works. Along with department wise reports, we are publishing the full list of schemes executed with the sanctioned amount.

(Dr. Ranoj Pegu)

Chief Executive Councillor
Mising Autonomous Council

PREFACE

The publication of Annual Report of the Mising Autonomous Council (MAC) for the year 2016-17 is a humble effort to highlight the policies, projects and programmes implemented by MAC. It is indeed a major achievement for an Autonomous Council to publish an Annual Report for three consecutive years elaborating the policies and details of schemes of the council.

During the financial year 2016-17 an amount of Rs 117.25 crore was released to the council and the council undertook 1095 schemes under 26 line departments. MAC has been putting maximum emphasis on rural infrastructure building as the entire MAC area is extremely backward in terms of road connectivity and school buildings etc. The other thrust areas are intervention of flood management, construction of guide bundhs, community building, land development, highland platform and boundary wall etc. Besides priority was given in livelihood and income generation activities in order to improve economic condition of the people living in MAC areas.

The council strictly follows the Assam Financial Rules, the Assam Fiscal Responsibility and Budget Management Act, 2005 (AFRBM), CVC guidelines and instructions given by the Govt. of Assam from time to time in execution of works. The schemes are primarily selected at grass root level by holding Parisadiya Gram Sabha and then scrutinised by Apex level Committee and then placed in Executive Council for inclusion in the Annual Operation Plan. Estimates are prepared with latest schedule of Rate of APWD and Technical Sanctions are obtained from competent authority. In case of procurement, NIT is invited by publishing advertisement in at least two News papers and in the Official website of MAC. The rate and quality of the materials to be procured are duly evaluated by a Departmental Purchase Committee (DPC) involving officials of line departments constituted by the council.

It is highly laudable that the elected honourable General Members have diligently, expeditiously and effectively performed their duties showing society with visible results. The hon'ble CEC, DY CEC and all the EC's have laboured hard to bring out this Annual Report with report of their respective departments. The hon'ble Chairman and CEC of MAC have also conveyed vision through their messages.

A Brief Note on MAC

Introduction:

The Mising Autonomous Council was established under the Mising Autonomous Council Act, 1995 passed by Assam Legislative Assembly with its H.Q. at Gogamukh, Dhemaji. An interim body of MAC was constituted in the same year. The Mising Autonomous Council Act, 1995 provides that the Mising Autonomous Council shall be constituted *"comprising of **Satellite Areas and Core Areas** for social, economic, educational, ethnic and cultural advancement of the Mising and other Scheduled Tribe communities residing therein."*

Core Area and Satellite Areas are defined by the Act as follows:

'Satellite Areas' mean the area or areas consisting of non-contiguous cluster of villages predominantly inhabited by Scheduled Tribes population having 50% and above as a whole in the cluster and not necessarily in the individual villages.

"Core Areas" means the compact and contiguous areas predominantly inhabited by Scheduled Tribes population having 50% and above as a whole in the area and not necessarily in the individual villages.

The Act provides for constitution of a 36 member General Council and a 15 member Executive Council out of the General Members. The General Council and the Executive Council ran on ad-hoc basis with

nominated members since its inception till October, 2013 when the first election to the MAC was held and an elected body assumed office on 6th November, 2013 which is now functioning smoothly.

Mission Statement

Our Mission is to work for social, economic, educational, ethnic and cultural advancement of the Mising, other Scheduled Tribes, Protected Classes and all other communities residing in Mising Autonomous Council area of Assam.

Vision Statement

Our Vision is to create a just and developed society in Mising Autonomous Council area with quality of life and standards of living equal to other people and other parts of our country.

Powers and Functions:

The Mising Autonomous Council has been provided with executive powers and functions on 34 subjects as listed below:

1. Cottage Industry
2. Animal Husbandry and Veterinary
3. Forest other than reserved forest.
4. Agriculture
5. Rural Roads and Bridges,
6. Sericulture
7. Education,
 - (i) Adult Education
 - (ii) Primary Education
 - (iii) Up to Higher Secondary including vocational training
8. Cultural Affairs
9. Soil conservation
10. Co-operation
11. Fisheries
12. Panchayat & Rural Development
13. Handloom & Textiles
14. Public Health Engineering-Drinking Water
15. Minor Irrigation
16. Social Welfare
17. Flood Control Schemes for protection of Villages (not of highly technical nature)
18. Sports & Youth Welfare
19. Weights & Measures
20. Library services
21. Museum and Archaeology\
22. Urban Development, Town & Country Planning
23. Tribal Research

24. Land & Land Revenue
25. Publicity & Public Relation
26. Tourism
27. Transport
28. Any other matter connected with development.
29. Municipal Board, Improvement Trust, District of Boards & other local-self Government of Village Administration.
30. Tribal Welfare
31. Market and Fair
32. Lotteries, Theatres, Dramatic performances & Cinema
33. Vital Statistics including registration of birth and deaths.
34. Food & Civil Supplies

Jurisdiction:

The Govt. of Assam, vide its notification No. TAD/BC/133/2005/52) has declared a list of 1239 villages to be covered under Core Area of MAC and 392 villages to be covered under Satellite Areas of MAC with equal status to all the Scheduled Tribes residing therein. These villages are located mostly in riverine areas on both the banks along the river Brahmaputra and Subansiri in the districts of Dhemaji, Lakhimpur, Sonitpur, Golaghat, Jorhat, Sibsagar, Dibrugarh and Tinsukia.

The list of villages was modified by deleting about 300 non-tribal populated villages at the time of holding elections in 2013 and the abstract of population is as follows now:

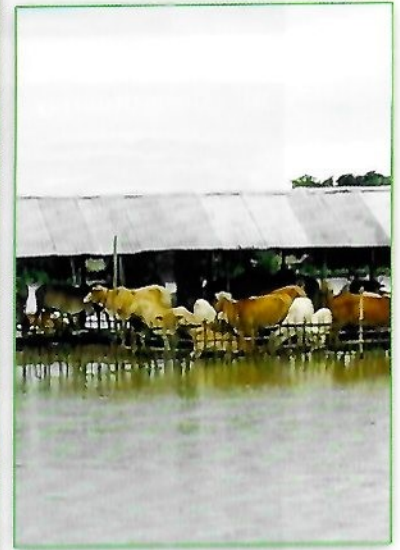

Sri Sarbananda Sonowal,
Hon'ble CM of Assam
in the General Council
Hall of MAC

List of Villages and Population

About the MAC Area

The MAC area stretches along the axes of two rivers of upper Assam – the Brahmaputra and the Subansiri. The Mising tribe, belonging to the North Assam branch of the Tibeto Burman linguistic group, is a riparian tribe and they live in the floodplains or water meadows on both the banks of river Brahmaputra from its headwaters in Tinsukia and Dhemaji districts up to Kaziranga National Park in Golaghat district on the south and up to Jiaboroli river on the north and, along the Subansiri river from the foothills up to its confluence with Brahmaputra. Besides, as both Brahmaputra and Subansiri are two large braided river systems, there are innumerable braid-bars or eyots (popularly known as Char or Chapori), some as large as several square kilometers in area, which too are inhabited by Mising people in the upper reaches. Along with the majority Misings, other scheduled tribes – Bodos, Hajongs, Garos, Rabhas, SonowalKacharis and Deuris; and some non-tribal communities also live in the area.

There are large numbers of other small rivers, rivulets and water-bodies criss-crossing the MAC area which were once a boon for prosperous livelihood. But in the aftermath of the great earthquake of 1950, the behavior and characteristics of both the rivers changed and recurrent high flood and fluvial erosion became regular which, over the years till date, have displaced large numbers of villages, eaten away unbelievable areas of arable land, casted sand deposits in paddy fields and silted up the natural water bodies and ponds. As a result, the erstwhile Lakhimpur district, now Lakhimpur and Dhemaji, which was once known as the rice bowl of Assam has become Assam's worst flood affected districts with poverty looming large. People had no option but to clear forest areas for settling anew.

Flood and Fluvial erosion continues to be the main problem of the entire MAC area and therefore, together

with the State Water Resources department, MAC must strive hard to find a sustainable solution and devise means of livelihood that can go along well in such situation and such flood terrain.

Economic Condition of MAC Area:

The entire MAC area is a zero industry zone and the only economic activities are agriculture and allied ones which are in most under developed or primitive type with farmers still using wooden plough pulled by bullocks, weavers weaving their primitive throw-shuttle looms with peg-warping, cattle pasturing in the open untethered, pigs skittering about in the villages and women folk herding in groups to the forest or to the wetland to collect edibles – roots, leaves or aquatic creatures.

Despite being unorganized and primitive – rice, mustard oil seed and black gram are produced aplenty owing to availability of land during the winter, and they are the main source of livelihood. Fishing is another means of livelihood and it too is unorganized and depends only on naturally produced fishes in the rivers and other water bodies. Other economic activities like cattle rearing, piggery, sericulture, handloom, etc. are small scale homestead activity and there is no large scale organized production.

There is urgent need for intervention through skill up-gradation, farm mechanization, irrigation, introduction of high yielding varieties, organizing the farmers into SHGs, JLGs, Cooperative society, producer groups, etc. and motivating them for organized and scientific farming which can transform the economic scenario.

Apart from cultivation of paddy, oil seed and other pulses – fishery, piggery, cattle rearing, sericulture and handloom holds ample scope for development as commercial activity in MAC area with long term strategic planning and effective in time intervention.

Funding of MAC:

The MAC is funded by the State Govt. of Assam under Tribal Sub Plan (TSP). Fund allocation to MAC was very little till 2005. In 2005, the Govt entered in to an agreement with the agitating tribal organizations and it was decided to enhance the budget allocation to MAC. Since then fund allocation has been gradually increased, although the amount always falls short of meeting huge

demands and needs.

Fund allocated to MAC since 1996-97 are given below. Funds allocated during 2010-11 was lapsed as there was no Council, not even a nominated one; and fund allocated for 2011-12 and 2012-13 were revenue deposited for the same reason. Fund for 2013-14 has been released after the elected council has taken charge and the same has been utilized.

1996-97	-	Rs. 5.12 Crore
1997-98	-	Rs. 5.46 Crore
1998-99	-	Rs. 2.87 Crore
1999-2000	-	Rs. 5.02 Crore
2000-01	-	Rs. 2.21 Crore
2001-02	-	Rs. 4.28 Crore
2002-03	-	Rs. 4.72 Crore
2003-04	-	Rs. 4.18 Crore
2004-05	-	Rs. 7.67 Crore
2005-06	-	Rs. 17.55 Crore
2006-07	-	Rs. 21.60 Crore
2007-08	-	Rs. 23.50 Crore
2008-09	-	Rs. 25.00 Crore
2009-10	-	Rs. 31.76 Crore
2010-11	-	Rs. 35.08 Crore (LAPSED)
2011-12	-	Rs. 41.35 Crore (Revenue Deposit)
2012-13	-	Rs. 45.97 Crore (Revenue Deposit)
2013-14	-	Rs. 53.69 Crore (Utilized)
2014-15	-	Rs. 58.52 Crore (Sanctioned)
		Rs. 29.26 Crore (Released)
2015-16	-	Rs. 64.37 Crore (Sanctioned)
		Rs. 32.18 Crore (Released)
2016-17	-	Rs. 147.25 Crore (Including Revenue Deposit)
		Rs. 117.25 Crore (Released)
2017-18	-	Rs. 72.00 Crore (Proposed)

Scope of Work

1. Agriculture: The MAC area is completely rural and its economy is fully agrarian. It falls in **North Bank Plain and Upper Brahmaputra Valley** agro-climatic zone. Land is mostly owned by small and marginal farmers practicing subsistence agriculture with single/double crop. Paddy is the staple crop with pockets of cash crop and peripheral crop growers. Farm mechanization is in a very nascent stage. The entire MAC area is flood prone which is a natural deterrent to intensive agriculture. Owing to the uncertainty due to flood, people desist from capital intensive crop. But there is abundance of fallow land, in the form of water meadows which provide ample opportunity for winter crop. Traditionally, a small portion of such available land is used for mustard oil seed and Autumn rice (Ahu) cultivation. With improvement of road connectivity network, effective motivation and well-timed supply of inputs, large number of farmers can be engaged during autumn and winter season on these vast riverine fallow land or water meadows for the following crops:

1. Boro rice cultivation
2. HYV of Ahu rice cultivation
3. Cultivation of HYV potato – Kufri – Pukhraj/Jyoti.
4. Cultivation of Toria (TS-36 and TS-38) to replace traditional mustard.
5. Introduction of SRI Rice cultivation.

2. Animal Husbandry & Veterinary: Steps have been taken to revamp the infrastructure of AH&V deptt., which is in a dilapidated condition in MAC area. 21 Nos of Veterinary Aid Centre/Sub Centres have been newly constructed under plan fund of MAC for the year 2013-14 and more such schemes are being taken up.

Livestock holds an important key to livelihood and economic growth in MAC area as majority tribal population practice piggery on small homestead basis, which are being assisted to develop into organized piggery unit with better breed. Demand for meat is ever increasing which can only be addressed by small scale but large in numbers of poultry farms. Schemes are taken up to train entrepreneurs, SHGs etc. to establish poultry farms with bank linkage. The vast water meadows of Brahmaputra and its tributaries provide ample

opportunity for cattle rearing – cow, water buffalo, goat and sheep. The only problem is shelter and feed during flood. Some 100 highland platforms have been constructed during 2013-14 which showed excellent performance during last flood as shelter. There are plans to construct such highland platform in all the water meadows of Brahmaputra river system.

3. Fisheries: Fish farming or pisciculture holds immense potentiality as a viable alternative mode of livelihood as well as commercial venture in MAC area due to abundance of natural water bodies like ponds, derelict rivers and rivulets, oxbow lakes, beels and vast areas of lowland. What is required is awareness and training on Integrated Fish-farming. MAC organises awareness and training program for intending fish farmers in coordination with State Fishery deptt. and at other resource centres.

The MAC will take up following steps:

- a. To conserve all existing natural water bodies for –both conservation and pisciculture.
- b. Construction of new ponds in feasible area.
- c. Establishment of eco-hatchery.
- d. Awareness and training on Integrated Fish-farming.
- e. Financial assistance through Bank linkage and other Govt. program.
- f. Co-ordination with state Fishery Deptt and other Agencies for Technical support and asset management.

4. Handloom & Textiles: Next to agriculture, handloom is the largest unorganized sector of livelihood. Every women of the Mising community is a weaver and Mising handloom products, particularly women wear, are high on demand in the market owing to its colourful intricate designs and their usable simplicity for women of all other communities. But Mising weavers practice peg-warping, use the primitive looms of bamboo frame, bamboo reed and through-shuttles which hinder maintenance of quality and quantum of production. The MAC will launch a mission with a 5 years perspective plan on Mising handloom and textiles with the following objective:

- a. Training of Mising weavers on improved fly-

shuttle looms and designing with dobby/jacquard machines.

- b. Construction of a series of Weaving Sheds/Common Facility Centers in select clusters.
- c. Taking up of massive skill up-gradation training program followed by supply of inputs to weavers so trained and registered with MAC.
- d. Assistance to NGOs/SHGs/JLGs sincerely engaged in handloom activities.
- e. Marketing support to the weavers by organising regular marketing fairs and festivals.
- f. Setting up of a Central Computerized R&D centre on Handloom at Gogamukh for Designing, product diversification, Value addition and Data Bank on Mising Handloom.

5. Cottage Industry: Schemes for infrastructure building and financial support to various cottage industries like bee keeping, cane & bamboo crafts, knitting & embroidery, pottery, etc. along with skill up-gradation trainings are executed. Tool kits are procured and distributed among rural artisans, craftsmen etc.

6. Social Forestry: Loss of natural forest cover is one of the causes of devastating impact of flood and erosion in MAC area. It has also rendered minor forest produces like – firewood, leaves, edible plants, medicinal plants etc. scarce for the community. MAC is taking up schemes to restore community forests and establish edible plant and medicinal plant gardens. Plantation along roads and river banks will also be taken up.

8. Rural Road & Bridges: Construction, repairing & maintenance of rural roads, culverts, bridges, Govt. or Council buildings, other public works etc. which fall under the MAC area are taken up after obtaining NoC and non-duplicity certificate from the concerned deptt.

During 2013-14, 100 Nos. of such construction schemes have been successfully executed.

9. Sericulture: Dhemaji and adjoining Lakhimpur district are traditional grower of wild silk – both Muga and Endi or Eri. Apart from the silk yarn produced from Muga and Endi rearing, the pupa or chrysalis, particularly of Endi are much sought after delicacy among the indigenous population. Because of its high protein and fat content, the silk pupa serves as a source of nutrition to fight malnutrition among children in rural area. But owing to recurring flood and erosion, scarcity

of feed plants, lack of incentives, market linkage etc. problems, the trade is now gradually dwindling away. What is required now is a massive revamping of sericulture with a holistic approach. There are a good number of Sericulture Farms in MAC area, all in dilapidated condition without fencing/ boundary wall and house for the keepers. MAC is drawing plan to revamp sericulture beginning with restoration of all the Govt. farms and taking up community plantation so that scarcity of feed plants are reduced in the first instance. In this stage, necessary inputs will be provided as incentive to the farmers.

10. Education: Education scenario in MAC area is very backward. Most of the educational institutions and academic atmosphere are affected by the following factors:

- a. Poor and insufficient infrastructure of the academic institutions.
- b. Poor Connectivity in remote areas.
- c. Inefficient and insufficient Teaching personnel.
- d. Poverty of the rural families etc.

The council will give special thrust on Education in the MAC area as follows:

- i. Construction, repairing & maintenance of educational institutions.
- ii. Grant-in-aid/financial assistance to educational institutions.
- iii. Supply of books, uniforms and other educational materials.
- iv. Holding of training, seminar, conduct of educational tour etc. for teacher and students.
- v. Coordination with the state Education Deptt. for fruitful implementation of Central Govt. and State Govt. program like SSA etc.
- vi. Scholarship to poor but meritorious students.
- vii. Reward to best performing Academic Institution and Teacher.

11. Cultural Affairs: The Misings and other indigenous communities inherit a rich folk art and culture which is the most important element of self-identity. But it is under threat of withering away due to lack of proper attention for preservation, promotion and development. The MAC is taking up schemes and program for preservation and practices of the art and

culture of Misings and all other communities residing in MAC area.

- a. The MAC will give emphasis on research work on Mising Folk Culture and in this regard grant may be provided.
- b. Setting up of Cultural Complex and Archive at different places.
- c. Construction of Auditorium, Kristi Bhawan, Rangamancha etc.
- d. Grant-in-Aid to Music Institutions, Clubs, Yuvak Sangha, Society etc. engaged in cultural activities.
- e. Production of Film, Documentary etc.
- f. Publication of Books
- g. Musical Instruments to Artist and Institutions.
- h. Holding of cultural festival etc.

12. Panchayat & Rural Development:

Construction, repairing & maintenance of any socio-economic community assets; rural roads & dykes, highland platform, schools; infrastructure for supporting Agriculture, Horticulture, Pisciculture, Animal husbandry etc.; infrastructural and financial support to SHGs/JLGs, Grant-in-Aid/Financial assistance to NGO etc. are being taken up. Endeavour will be made to coordinate all works with the PRIs for synergy and to avoid duplicity.

The MAC will also make co-ordination with the State P&RD Deptt., NIRD, SIRD, NEDFi and other such institutions for Transfer of Technology, Skill up-gradation training etc.

13. PHE: Drinking water and sanitation are major areas calling for intervention of substantial nature in MAC area. It is a common practice to defecate in the open and drink water from river, pond, nullah etc. in the tribal villages. Demands for installation of shallow/deep tube wells, ring wells and supply of hand tube wells are very high and MAC have no option but to attend to such demands with utmost priority. Community drinking water supply schemes are being taken up in phased manner in select clusters. Public/community toilets in various public places have been constructed.

14. Irrigation: Agricultural practices of the majority tribal people of MAC area are still primitive in nature with rain dependent single crop cultivation and the Agriculture department of MAC shall have to introduce organised scientific cultivation with multi crop practice of high yielding varieties. The schemes/works under Irrigation department are to be in tandem with the schemes/works under Agriculture department. Schemes like boring of wells, gully control, digging of channel, construction of bund, water reservoir, procurement of pumps etc are taken up by MAC.

The MAC will seek co-ordination from the state Irrigation Deptt. and other agencies for identification and preparation of works, technical supervision and implementation of works and asset maintenance.

15. Social Welfare: Implementation of Central or State sponsored schemes as per Govt. guideline. Besides, schemes for welfare of women, children, old age people, differently able persons are also taken up. Schemes like setting up of old age home, crèche, children parks etc. are being planned.

Review meeting of MAC with Sri V. K. Pipersenia Chief Secretary of Assam and Sri Hrishikesh Goswami, Media Adviser to Hon'ble CM of Assam

16. Water Resource: Flood and fluvial erosion continues to be the principal problem affecting the entire population of the MAC area. Being entirely low lying floodplains, the MAC areas get inundated every year by flood from river Brahmaputra and its tributaries and there are regular disasters caused by breach of dykes, washing away of villages and casting thick layers of sand on paddy fields. Tens of thousands of people have been rendered landless and homeless over the last few decades. Such disasters have been happening regularly due to lack of sensible and well-timed maintenance and repairing of the dykes. Lack of response from the appropriate authority in time to supplications for sanction of few lakhs of rupees to repair a damaged dyke has led, on most occasions, to breach of the dyke during flood. The same story holds true for fluvial erosion too, leading to loss of hundreds of hectares of agricultural land. The MAC, as an autonomous body can intervene here very effectively with timely action attending to urgent situations which are not of highly technical in nature.

99 Nos. of flood and erosion management schemes have been executed by the Council with an expenditure of Rs. 644.71 lakhs during 2013-14. The works are mostly of RCC porcupine screening, bund construction, raising and strengthening of dykes, construction of bamboo palisades, boulder protection work etc.

17. Sports & Youth Welfare: Development of Playground, Grant-in-aid to Sports/ Youth Club/ Associations, supply of sports materials, assistance to individual for participation in various competitions/ events etc. have been executed.

Plans are being drawn to set up a water sports complex at Kareng village near Bogibeel Bridge and a modern stadium at Gogamukh.

18. Tourism: Four hot tourist destinations fall partly in MAC area – three National Parks – namely Kaziranga, Nameri and Dibru-Saikhowa; and a cultural landscape – the Majuli Island. Besides there are many other areas with potentiality for development as ecotourism, cultural and/or ethno-tourism destination. But the main constraint in development of tourism in MAC area is lack of quality infrastructure and service.

MAC has already constructed three Eco Camps with bamboo cottages and Swiss tents. They are –

- Me:po Okum at Sitadar village, Majuli – open for tourists.
- Subansiri Eco Camp on the banks of Subansiri river near Gogamukh – open for tourists.
- Agoratoli Eco Camp at Teliabari village near Kaziranga – scheduled for opening in October, 2015.

Proposals for construction of two more Eco Camps with Swiss Tents – one on the banks of Siang river near Jonai and the other at Dharikati village near Nameri NP are under consideration. Packages are being developed for introduction of river cruising on Siang and Subansiri river.

19. Health & Family Welfare: The health scenario in MAC area is far from being healthy and health service to the rural populations of remote areas is still an illusion. The basic objective of schemes/works under Health & Family Welfare department of MAC is to fill up gaps in NRHM works. There are large numbers of Health Sub-centres in MAC area, particularly in remote riverine areas or river islands/eyots without any house/building and/or Nurse's quarter. The nurse, posted in such Sub-centers, abstain from duty on the plea of lack of any building/quarter there to stay. Presently, Rural Health Practitioners are being posted in such Sub-centres without any quarter to stay.

27 Nos. of Doctor/Nurse quarters and Health Sub-Centres have been constructed by MAC during 2013-14 with an expenditure of Rs. 166.16 lakhs. More such buildings are being planned to be renovated/constructed in phased manner.

20. WPT&BC: A wide range of schemes, preferably in coordination with other departments and particularly to fill up gaps are taken up under WPT&BC department. However, as the thrust of MAC would be to remove backwardness, improve infrastructure, health, education, sanitation, drinking water, employment generation and other such supplementary schemes are taken up under WPT&BC department. Besides, schemes for strengthening of the voluntary sector, SHGs and Cooperatives are also taken up.

Project Formulation and Procedure

The Council follows the guideline and instructions given by the Govt. of Assam from time to time as follows:

1. The Council takes the forum of Gram Sabha for selection of schemes, beneficiaries etc. in a transparent way.
2. Non duplicity certificate is obtained from PRIs/Line departments etc. against any proposed scheme.
3. The Council evaluates the objective, benefit and appropriateness of the Schemes.
4. Estimates are prepared with the latest Schedule of Rate of APWD and other line departments and Technical Sanction is obtained from competent authority.
5. In case of procurement, NIT is called by publishing advertisement in at least 2 News papers and the official web site of MAC. The Rate and quality of the materials to be procured are evaluated by a Departmental Purchase Committee (DPC) constituted by the Council with members drawn from the concerned line departments.
6. The Council strictly follows the Assam Financial Rules, the Assam Fiscal Responsibility and Budget Management Act, 2005 (AFRBM) and CVC guideline in execution of its works and all the files are routed through FAO (an AFS officer).
7. Apart from technical assistance taken from the line departments of the Govt. of Assam, the Council consults the Krishi Vigyan Kendra and Regional Agriculture Research Stations of Assam Agricultural University and various other State as well as Central Govt. Institutions.
8. In case of individual beneficiary oriented schemes, apex level and constituency level committees are constituted for implementation and monitoring of schemes.
9. The welfare and development schemes/ projects taken up by MAC must conform to the policies of the State Govt. for similar nature of schemes.

Boat is the only means of transport during flood in many MAC areas

Animal Husbandry & Veterinary

Introduction

The economy of MAC area is agro based with lives and livelihoods depending upon agriculture and allied activities. Livestock holds an important key to livelihood and economic growth in MAC area as majority tribal population practice piggery and poultry on small homestead basis. Besides, other cattle are reared by every household. Apart from rearing cows for milk, oxen are still used to pull ploughs and carts in MAC area. Therefore, MAC is giving utmost importance for development of AH&V sector in the Council area to develop infrastructure and give financial assistance with the motive to develop successful entrepreneurial skills amongst the rural farmers.

An amount of Rs. 97.75 lacs was allotted to the department during the financial year of 2016-17 for execution of 9 Nos. of schemes.

Cattle Vaccination Camps:

Vaccination is an area which requires vast promotion and intervention. Moreover, MAC areas are prone to floods and post floods, lots of diseases get spread disturbing lives, livestock and livelihoods. The

people, post floods, often find it really hard to cope with such disasters and thus the council decided to organise vaccination camps across different areas and an amount of Rs.25.00 lakhs was spent during its execution.

Assistance for Pig Farming:

The entire mising community is well known for pig rearing. It is an age old tradition amongst the tribe.

Cattle Vaccination camps are organised by MAC jointly with AH&V Deptt.

Training on good management practices for Pig Farms

Pig consumption is also quite high in these areas and the entire North-Eastern states. Pig meat has good demand. However, despite of all these opportunities, this trade have never really taken off, reason being the lack of entrepreneurial spirit in the region. Pig rearing is an age-old practice but now it is the time to take it into the next level and think it as an alternative source of income. The area lacks in organised pig farming which is why the trade almost goes unnoticed.

The council, like previous years, continued with its hand holding program to develop rural entrepreneurs for pig farming. A total of 200 numbers of rural youths were trained in scientific pig farming under Nation Research Centre for Pig. Moreover, 14

Training of Youths at ICAR-
National Research Centre on Pig at Rani, Kamrup

- **Livestock**
Vaccination and Health Check-up Camps are held in different areas of MAC jointly with state AH&V department
- Unemployed youths are being regularly trained on Scientific Pig farming at National Research Centre on Pig, Rani Guwahati

numbers of SHGs were provided with grant in aids of Rs.1.50lacs each for construction of pigsty.

Other Schemes:

Apart from the above mentioned schemes, there were five schemes of infrastructure development of veterinary services, mainly the sub centers covering the remote areas. The scope of goat rearing is very promising, especially in the areas nearby the hilly terrains of Arunachal. The Rupohi Goat breeding farm was given a grant in aid of Rs. 10.00 lacs for its expansion.

২০৩০ চনত ১০ লাখ গছ কপণ

আহক সকলোৰে
এই অভিযানৰ অংশীদাৰ হও।

Loss of natural forest cover is one of the causes of devastating impact of flood and erosion in MAC area. It has also rendered minor forest produces like firewood, leaves, edible plants, medicinal plants etc. scarce for the community. MAC is taking up schemes to restore community forests and establish edible plant and medicinal plant gardens. Plantation along roads and river banks will also be taken up.

The year 2016-17 saw an allotment of Rs.26.00 lakhs to the department for execution of its proposed schemes.

An amount of Rs.26.00 lakhs was spent for installation of solar fencing under 4 different schemes. The purpose is to give protection against wild animals, mainly elephants.

Biju Pegu

Biju Pegu
 Executive Councilor
 i/c Social Forestry

Agriculture

- Introduction of Boro paddy cultivation to avoid crop damage by flood is a focused intervention. MAC is working in collaboration with TATA TRUSTS in a project on Boro Paddy.
- Improvement of Mustard oil seed production in MAC are has been achieved with distribution of HYV seeds like TS-36 and 38 for three consecutive years now.

Introduction:

An amount of Rs. 429.36 Lakhs was allocated to the Agriculture department during 2016-17 and a total of as many as thirty-three (33) numbers of schemes were executed during this period. Being an agrarian economy, the council has always put special emphasis on strengthening it through various schemes and this year was no different

either. The schemes executed included construction of agri bunds and roads, free tractorizations, grant in aids to different farming groups etc. The schemes of Agriculture department for the year 2016-17

must be looked at with a holistic view of the schemes of preceding and succeeding years.

Procurement Schemes:

A total of 4 numbers of procurement schemes were executed during the year and an amount of Rs. 87.90 lacs was spent during the process. These included procurements of conno-weeders and polythene sheets for the MAC Tata Trusts collaborative project and procurement of

improved variety Boro paddy seeds and Toria seeds for distribution amongst farmers across MAC areas.

Construction of Guide Bunds, Agri Bunds and Roads:

As many as 19 numbers of schemes were taken up this year and a total of Rs. 128.46 lakhs were spent during its execution. The council areas are prone to floods and early monsoons often create problems for the farmers. Yet, during the winters, these areas often suffer from low to heavy amount of dry patches. This shows the irregularity and unpredictability of the climate over these areas and thus construction of such agri/guide bunds become very much relevant for better management of the crops and farms.

Farmer Shelter Sheds:

The council this year took this unique scheme of constructing multi-purpose shelter sheds for farmer. The objective is to allow the farmers, working so hard under adverse weather conditions, to have some sort of shelter whenever required. Moreover these places have space for emergency storages also. As many as three such schemes were executed at an expense of Rs.18.00 lakhs.

- MAC has provided a subsidy of Rs. 5.00 lakh each to 20 Nos. of Farmers groups for purchase of tractors.
- Sugarcane and Banana cultivation has been promoted in MAC area as cash crop with technical support from Sugarcane Research Station and Regional Agriculture Research Station of Assam Agricultural University.

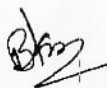

Livelihood Schemes:

Financial assistances were provided to the farmers along with technical supports for cultivation of banana and sugarcane like the previous years. Special technical guidance was provided through Sugarcane Research Centre and Krishi Vigyan Kendras. A total of Rs.85.00 lakhs were spent during the process. Also, an amount of Rs.5.00 lakhs was spent as financial assistances to farmers for bamboo plantation. The Upper Brahmaputra Lac Farmers' Association received an amount of Rs.5.00 lakhs as grant in aid for

procurement and distribution of brood lac.

The council also allowed 75% subsidy to farmer

handing over Tractor key to a beneficiary

Public Works Department

Introduction

A total of Rs.2861.24 was allotted to the Public Works Department for the year 2016-17. The fund was used for the execution of various schemes and projects, especially construction of culverts across various parts of the council areas. Procurement of GCI sheets worth Rs.150.00 lakhs was done for distribution amongst flood displaced and BPL families. The entire year saw a lot of infrastructural development in the MAC through the Public Works Department.

Culvert Constructions

A total of 109 culverts of various sorts were built during the year and a total of Rs.1040.34 lakhs was used for constructions. Most of the culverts were RCC box type ones, where as multi cell culverts were also constructed in some of the places according to its geography. Need for proper passage of over flown / logged water during monsoons is well known to everyone and considering the repeated floods that the council areas face, need for culverts is a must.

Road Constructions

The year saw construction/renovation / extension of a total of 204 numbers of rural roads across MAC areas and a total of

○ 109 Nos. of Culverts, mostly on rural roads, have been constructed with an expenditure of 1040.00 lakhs

○ 203 Nos. of Rural and Village Road have been improved or newly constructed with an expenditure of Rs. 1290.00 lakhs

Rs.1290.46 lakhs was used in those. The council firmly believes that transportation and communication system is one of the major factors for developing a place and without proper roads this can never be possible. The council tried to improve its road connectivity to the interior places through construction and improvement of its rural roads.

Other Constructions

Other constructions mostly included buildings and boundary walls. The year 2016-17 saw a whopping

infrastructural development in the MAC areas. Improvement of road connectivity was very much visible and it helped the people a lot in many ways. The council hopes to continue this trend in the coming years too.

(Dr. Ranoj Pegu)
Chief Executive Councilor, PWD

As the entire MAC area is riverine plains crisscrossed by numerous rivers, rivulets and other water bodies, road connectivity is a major challenge demanding construction of large number of bridges and culverts

MAC has constructed 113 Nos. of culverts of different sizes during 2016-17 with an expenditure of Rs. 1080.00 lakhs

DEPARTMENT

Sericulture

Introduction

Sericulture, particularly the rearing of wild silk varieties Muga and Endi or Eri have always been a part of life & livelihood for the indigenous people of upper Assam including the Mising, Bodo etc tribes. Apart from the silk yarn produced from Muga and Endi rearing, the pupa or chrysalis, particularly of Endi are much sought after delicacy among the indigenous population. Because of its high protein and fat content, the silk pupa serves as a source of nutrition to fight malnutrition among children in rural area. But owing to recurring flood and erosion, scarcity of feed plants, lack of incentives, market linkage etc.

Development of Composite Sericulture Farm at 1 no. Mesaki Tongani Gaon, Ujani Sissi G.P.

Borpat (Ailanthus)

- 12 Sericulture Farmshave been developed in different areas
- MAC is introducing Borpat (Ailanthus) plantation in MAC area to promote sustainable Eri rearing

problems, the trade is now gradually dwindling away. What is required now is a massive revamping of sericulture with a holistic approach.

MAC is in contact with the Central Muga and Eri Research & Training Institute (CMERTI) under Central Silk Board to draw a comprehensive program for revamping this traditional economic activity with larger commercial objective.

An amount of Rs.51.62lacs was spent during the year by the department for execution of 12 numbers of schemes. Most of the schemes focused upon developing plantation farms which could later be used for rearing of silk worms. The council prioritized upon developing composite sericulture farms more.

Jogyeswar Kutum
Executive Councilor
i/c Fisheries & Sericulture

Education

Introduction:

A total fund of Rs. 1230.99 lacs were allotted for the Education Department for execution of 57 numbers of schemes during the year. There was procurement of 500 units of steel almirahs for distribution among educational institutions, clubs, yuvak sanghas etc. and an amount of Rs. 64.96 lakhs were spent by the department for the same.

Grant in aids

A total of 31 numbers of grants in aid schemes were executed by the department during the year and a

total of Rs.765.10 lakhs were spent during the year. Educational institutes received these amounts for infrastructural developments starting from construction, extension to renovation. A total of around 111 numbers of educational institutes received grant in aids from the education department. The amounts varied according to the needs of the institutes.

Construction Schemes

As many as 21 numbers of schemes were executed

by the department during the year where it directly dealt with construction and infrastructure development of educational institutes. A total of Rs. 219.43 lacs were spent during the execution of these schemes. The schemes mostly included construction of classrooms, hostels, boundary walls etc.

Financial Assistance

Financial Incentives of Rs. 5000.00 each was provided to students securing First Division in HSLC, HS or Equivalent Examinations in 2016 and a total of

- 20 Nos. of Colleges (including Jr. Colleges) have been developed with a grant of Rs. 298.00 lakhs
- 70 Nos. of LP and ME Schools have been developed with a grant of Rs. 375.53 lakhs
- 50 Nos. of High Schools have been developed with a grant of Rs. 291.00 lakhs

3000 numbers of students across the MAC areas were covered through it.

Financial assistances to meritorious yet poor students were also offered during the year and a total of Rs.20.00 lakhs was spent. The objective of the scheme was to motivate and support the higher education of the bright students belonging to poorer section of the society.

Raju Medok
Executive Councilor i/c Education, Library Service

Cultural Affairs

Introduction

The Mising and other indigenous communities residing in MAC areas inherit a rich folk art and culture which is the most important element of their identity. But it is under threat of withering away due to lack of proper attention for preservation, promotion and development. The MAC is taking up schemes and program for preservation and practices of the art and culture of Mising and all other communities residing in MAC area and the department of Cultural Affairs is responsible for it.

A total of Rs.775.31 lacs were allotted to the department for the year 2016-17 and a total of 57 numbers of schemes were executed during the year.

Construction Schemes

As many as 49 numbers of construction schemes were executed during the year by the department and a total of Rs. 340.05 lakhs was spent. The primary objective of the schemes was to ensure infrastructural growth in the area in order to promote

and preserve the cultural heritage of the indigenous communities. Rangamanchas, Open Stages, Community Halls, Murong Ghars etc. were constructed and renovated in various places.

Grant in Aid Schemes

A total of 6 numbers of grants in aid schemes were executed during the year and an amount of 415.26 lakhs of rupees was spent during the process. 16 Bathow

Cultural Centres and 61 Mising Tradition Murongs (youth dormitory) were provided with Rs. 5.00 lakhs each for renovation/construction purposes.

The Murong Ghar system is the backbone of the Mising social institution which is unique by its own nature. The Murong system has been followed as the tradition from immemorial past and every Mising village should have a Murong Ghar to reflect their social unity and economic strength. Although, the Murong house is a term used in some tribe to denote youth clubs of unmarried boys and girls (Youth Dormitory), yet it holds

much more important socio-cultural significance for the Mising people. In the Mising society Murong is a symbol of village unity, integrity and assimilation. The performances of collective social functions, feast, festivals, training of dancing and singing etc. are some usages of the Murong Ghar.

- 61 Nos. of Murong (traditional youth dormitory of the Misings) have been constructed with an expenditure of Rs. 308.00 lakhs.
- 21 Nos. of Bathow (traditional Boro Cultural Centre) have been constructed with an expenditure of Rs. 130.00 lakhs.
- 16 Nos. of Village Community Halls have been constructed with an expenditure of Rs. 81.40 lakhs.
- 24 Nos. of Rangamancha (Open Stage) have been constructed with an expenditure of 185.65 lakhs.

Moreover, an amount of Rs. 20.00 lakhs was spent for providing financial support to indigenous and tribal performing artists. Such artists are backbone of any community when it comes to promotion and preservation of cultural heritage. The council believes that such artists' hard work must be appreciated and celebrated.

Prasanta Bori
Executive Councilor
Cultural Affairs, Tourism

Co-operation

Introduction:

As the name suggests, the department of cooperation is well known for its co-operative and versatile nature. The nature of schemes executed by the department during 2016-17 in it indicates the same fact. A total of 9 numbers of schemes were executed against an allotment of Ruppes 597.18 lakhs during the year. The nature of the schemes was either of grants in aids or constriction related schemes.

Grant in Aid Schemes:

A total of three numbers of grants in aid

- 80 Nos. of Community Halls have been constructed with an expenditure of Rs. 400.00 lakhs
- Financial assistance has been given to 149 Nos. of Village Community Institutions @ Rs. 1.00 lakh each

schemes were executed by the department during 2016-17. Major schemes were related to construction/renovation of Anchalik Community halls as well as Village Community Halls. A total of 80 Anchalik Community Halls received grants of Rs. 5.00lacs each for construction/repairing or renovation whereas 149 numbers of Village Community Halls received an amount of Rs.1.00 lakh each for similar purposes.

Construction Schemes:

There were 6 numbers of construction schemes executed by the department during 2016-17. These included construction of a cottage industry shed, community halls, boundary walls etc. A total of Rs.36.18 lakhs was spent during the execution of these schemes.

Nilo Kanta Doley
i/c Executive Councilor
Cooperation & Transport

Fishery

Introduction

Fishery is one of the major allied activities alongside core agricultural activities in the MAC areas. Enhancing the area under commercial fish farming, increasing productivity and ensuring remunerative price realization through market linkages can improve the economic conditions of the rural communities for sure.

A total of Rs. 201.99 lakhs was allotted to the department and it was utilized against the execution of 10 numbers of schemes.

CML-Tata Trusts & MAC collaborative Livelihood Project

A collaborative multi-theme livelihood project in between CML and Tata Trusts with MAC is presently

under progress. The project basically has targeted 3

- MAC in collaboration with Tata Trusts has been developing 3 fishery clusters with hand holding support to farmers and spent Rs. 89.80 lakhs during 2016-17
- There are numerous natural water bodies in MAC area. The Council has spent Rs. 66.00 lakhs this year to develop 33 Nos. of such natural water bodies
- 1000 unemployed youths have been given training on composite fish farming

sectors Handloom, Boro Paddy Cultivation and Fishery.

Under its fishery wing, during this year of intervention, a total of 180 numbers of beneficiaries were covered under this project and financial assistance of Rs.21000.00 each was provided against pond development.

A total of 50 new fishery tanks were dug across the three different clusters of this collaborative project during the year. An amount of Rs.25.00lacs was spent for the same.

The department also decided to construct three

numbers of training halls cum office of fish farmer groups across the three clusters for Rs.9.00 lakhs each. Work order was issued and work is under progress now.

Other Schemes

60 new fishery ponds were constructed under the Nawkata GP by the council in order to promote collective cluster efforts in the community towards fish farming. Moreover, 1000 unemployed youths across all constituencies are presently being trained upon scientific composite fish farming with the objective of promoting entrepreneurial vibes in these interior places.

The council, seeing its potential in fish farming, developed 33 numbers of natural water bodies into community fish farms and a total of 66.00 lakhs of rupees was spent. The council also developed one Pan Culture fishery under the Ranganadi Constituency.

Jogyeswar Kutum
Executive Councilor
i/c Fisheries & Sericulture

Panchayat & Rural Development

Introduction:

Devolution of power to the grass root level is one of the significances of a democratic system and the Village Panchayats form the basic foundation in this system. Panchayats are the representatives of the people at the grass root level and are aware of the issues in their respective localities. The department of Panchayat and

Rural Development (P&RD) is the one which is responsible for the smooth functioning of the village panchayats and other development works in the rural areas. The department is unique because of the fact that it needs to apply both bottom-up as well as top-down approaches for the successful implementations of various rural development projects.

The year 2016-17 saw an allocation of Rs. 1278.01lacs to the department of P&RD and a total of 101 numbers of schemes were executed during the year.

There was procurement of GCI sheets for distributing amongst Village Institutions, Clubs, Yuvak Sanghas, etc. and an amount of Rs. 100.00lakhs was spent for the same.

Construction of Highland/Raised Platforms

Recurring floods every year take a toll in the MAC areas destroying lives and livelihoods. At such times of emergency, what the people need is a place where they can take shelter along with their livestock and other household utensils. The department of P&RD recognised this fact well and decided to take measures by constructing highland platforms regarding the same.

Highland platforms are basically raised platforms where people can take temporary shelters during floods/crosons.

These are particularly important during emergency times especially for evacuation or displacement purposes.

A total of 103 such highland/raised platforms were constructed across different constituencies during the year

2016-17. The construction sites were selected based on the flood vulnerability analysis done in and around different sites. Each of such highland platforms cost ₹6.18lacs.

- 102 Nos. of Highland Platforms have been constructed for shelter during flood with an expenditure of Rs. 630.36 lakhs

Construction of RCC/Hume Pipe Culverts

As many as 23 numbers of culverts, both RCC and Hume Pipe, were constructed during the year against an expense of Rs. 106.15 lakhs during the year. Water logging and overflow of waterways often lead to breaking of roads in rural areas creating massive issues in transportation and communication systems. Construction of culverts allows safe passage of water protecting the roads and lands from flooding and erosions.

Improvement of Rural Roads

A total of 72 schemes of improvement of rural roads were executed by the department during the year. A total of Rs.352.50 lakhs were spent for improvement of rural roads.

Johan Doley

Johan Doley

Executive Councilor

P&RD, Tribal Research, Museum

- 25 Nos. of Culverts have been constructed in rural areas with an expenditure of Rs. 119.00 lakhs
- 72 Nos. of rural roads have been constructed with an expenditure of 352.50 lakhs

Handloom & Textile

Introduction:

Handloom, the second largest unorganised sector in the country after agriculture, holds utmost importance in the council areas. The Mising women are born weavers and weaving activities are one of the prime means of livelihoods in the areas. Mising women are born weavers and their products are much appreciated and accepted across different parts of the state as well as the country. The Handloom and Textiles Department was allotted with a total fund of ₹ 381.90 Lakhs and a total of eleven numbers of schemes were executed during the year.

Procurement worth Rs.233.64 lakhs of dyed 2/80 count high quality cotton yarn in different shades was done for distribution amongst poor weavers of the area.

CML Tata Trusts & MAC Collaborative Multi-theme Livelihood Project

A collaborative multi-theme livelihood project in

between CML and Tata Trusts with MAC is presently under progress. The project basically has targeted 3 sectors Handloom, Boro Paddy Cultivation and Fishery.

Under the handloom sector, a total of 225 numbers of weavers were supported by the department

with provision of handloom accessories and GCI sheets for construction of weaving shed. An amount of Rs.25.90 lakhs was spent during the year.

Three weaving facility centres are to be constructed in the three target clusters of the project and an amount of Rs.9.00 lakhs will be spent. Work is presently under progress.

Construction Schemes

Five numbers of community weaving halls were constructed during the year at the expense of Rs.25.00 lakhs. Moreover couple of other community weaving halls were renovated for Rs.4.00 lakhs each.

Other Major Schemes

6 numbers of semi residential weavers' skill upgradation training programs with distribution of loom accessories and GCI sheets

- MAC in collaboration with Tata Trusts has been developing 3 handloom clusters with hand holding support to weavers and spent Rs. 35.90 lakhs during 2016-17
- 10 Nos. of Weaving Halls have been constructed with an amount of Rs. 60.00 lakhs
- 18000 bundles of colour fast quality cotton yarn have been distributed among poor weavers

were planned and executed during the year. Moreover, conducting expos and exhibitions at different parts of the country has also been executed.

Ranjana Doley

Executive Councilor Handloom & Textiles

Public Health Engineering

Introduction

Health and hygiene are key aspects of a prosperous and healthy human life. Safe drinking water holds the key when it comes to living a healthy and strong life. Water spread diseases are most common in rural areas leading to other major health issues and the present council is very much aware of this fact. The present council has been very much in favour of bringing in pure drinking water facilities in the area and PHED is responsible for the projects related to it. A total of Rs. 326.27 lakhs were allotted to the department and it executed 9 numbers of schemes during 2016-17.

Procurement

Out of the allotted amount, there were

Distribution of Hand Tube Well sets among BPL families

procurements of 3000 numbers of hand tube wells worth Rs. 153.00 lakhs for distributing amongst the families belonging to the BPL category.

Installation of Hand Tube Well complete with CC floor, Drain & Soak Pit in MAC areas

Installation of Hand Tube Wells

300 schemes of installation of HTWs complete with CC platform, drain and soak pit were executed by the department. Each installation cost Rs.0.21 lakhs and a total of Rs.63.00 lakhs were spent.

Installation of Ring Well

A total of 53 nos. of scheme of installation of

Construction of Public Toilet in MAC areas

- 3000 Hand Tube Well sets have been distributed among BPL families in crisis areas.
- 300 Hand Tube Wells complete with CC Floor, Drain and Soak Pit have been installed with an expenditure of Rs. 63.00 lakhs.
- 53 Nos. of Ring Wells Complete with CC Floor, Drain and Soak Pit have been installed at an amount of Rs. 47.70 lakhs.

ring well complete with RCC platform, drain and soak pit were executed during the year. Each unit cost was of Rs.0.90 lakhs.

Both the schemes shows MAC constant effort to minimise health hazards related to drinking water in its areas.

Other Schemes

Other major schemes included construction of 11 numbers of public toilets in various places.

Roma Pait
Executive Councilor
Public Health Engineering

Installation of Ring Well complete with CC floor, Drain & Soak Pit in MAC areas

Minor Irrigation

Introduction:

Assam is predominantly an agrarian economy and the MAC area is no different from it. In fact, proportion wise, the involvement of the work force in agriculture and allied activities is even more in case of the MAC area. However, the farming practices are rain-fed and traditional ones and heavily depend upon the season.

Lack of irrigational infrastructure is a major cause of concern across the state. Despite being blessed with the abundant resources, the state has failed to achieve any major breakthrough in irrigation. Out of 41.05 lakh hectares of gross cropped area, only 7.97 lakh hectares have been irrigated so far (2010-11, Nedfi data bank) across the state.

The MAC area is prone to flood and erosions.

Flash floods too are a major threat. However, the water retention capacity of the area is low resulting in scarcity

Construction of Gully Control at Chiloni Jan (Nalbari Constituency)

- 700 Nos. of 5 HP Diesel Pump Sets and 128 Nos. of 2 HP Electric Pump Sets have been distributed to farmers under Tata Trust – MAC Collaborative Livelihood Project
- 14 Nos. of Irrigation Channels have been dug with an expenditure of Rs. 57.69 lakhs

of water in the fields from Nov/Dec till Mar/Apr and farm activities become very limited in this period. However, with minor irrigational schemes, this can be handled tactfully and in the local level.

The present council understands the whole problem very well and a total of ₹ 308.56 lakhs was allotted to the department of minor irrigation and was used for the execution of 23 numbers of different schemes throughout the year.

There was procurement of 700 units of 5 Hp Diesel Pumpsets with complete accessories and 128 units of 2 Hp Electric Pumpsets for distributing amongst farmers and farmer groups. An amount of Rs.215.87 lakhs was spent for these procurements.

Channel Cutting

Channel cutting for irrigating the fields is a common yet effective practice in these areas and as many as 14 channels were cut / renovated by the council during the year for the benefits of the farmers. A total of Rs.57.69 lakh was spent over the schemes.

Construction of Guide Bund

During the year, four schemes of guide bundh was executed by the department at the expense of Rs.17.00 lakhs. Guide bunds help in guiding the water flow according to our convenience. The water is basically guided in order to control floods and erosions and help water in reaching the unirrigated lands.

Prabhat Basumary

Prabhat Basumary
Executive Councilor
Irrigation, Sports & Youth Welfare

Social Welfare

Implementation of Central or State sponsored schemes as per Govt. guidelines is the basic responsibility of the department. Besides, schemes for welfare of women, children, old age people, and differently able persons are also taken up by the department. Schemes like setting up of old age home, crèche, children parks etc. are also being planned whenever required.

The financial year 2016-17 saw an allocation of only Rs.9.00 lakhs to the department. The department during the year executed two schemes construction of Ranganadi Gaon Burha Kalyan Bhawan and and construction of Thakur Kalyan Samajoffice building at Sliapathar. However, the department coordinated well with other departments and provided the necessary support in every aspect.

Mula Kanta Pegu
Executive Councillor
i/c Social Welfare Deptt.,
Health & Family Welfare

Water Resource

Introduction

The Department of Water Resource was allotted a total fund of Rs. 1018.86 lakhs for the execution of its different schemes and projects in 2016-17. Being situated in flood plains of Subansiri and Brahmaputra, the Department becomes even more crucial for the entire MAC area. As known to all, the MAC area is very much prone to disasters, especially recurring floods and erosions. The Water Resource Department came up with different schemes in order to control the damages.

Boulder Works

The boulder works basically included construction of Boulder Spurs.

Boulder spur helps in reducing erosions and is a very effective measure for erosion control. The most affected areas due to erosions were selected for this project. A total of seven numbers of different boulder work project was executed during the year at the expense of Rs. 58.00 lakhs.

Earth Works

The earth works basically included construction of Guide Bunds, Channel Cutting, strengthening of Land

Spurs and repair and maintenance of Dykes. So basically it dealt with flood and erosion control, the two major issues of the MAC area. The majorly effected constituencies and the areas were targeted by these projects. A total of 26 numbers of schemes were executed during the year at the expense of Rs.182.00 lakhs.

Bamboo Works

The bamboo works include construction of Bamboo Fencing and Erection of Bamboo Cribbs and protective Bamboo Palisading. The year saw the execution of as many as 9 different projects of bamboo works under the department and a total of Rs.56.00 lakhs were spent during its execution. Flood and erosion control measures were taken up by the department through its bamboo works projects.

Construction of RCC Porcupine

RCC Porcupine is considered as one of the most effective measures in controlling erosions. Being vastly

Erosion protection work by Bamboo Triangular Cage

Erosion protection with RCC Porcupine screening

Erosion protection with Boulder Spur

- 60 Nos. of schemes for erosion protection with RCC Porcupines have been executed with an expenditure of Rs. 565.99 lakhs.
- 9 Nos. of schemes for erosion protection with Bamboo work have been executed with an expenditure of Rs. 56.00 lakhs.
- 7 Nos. of schemes for erosion protection with Boulder work have been executed with an expenditure of Rs. 58.00 lakhs.
- 24 Nos. of schemes for flood control with embankment have been executed with an expenditure of Rs. 172.00 lakhs.

affected by flood and erosion, the riverine areas require major protections. The present council understood this well and initiatives were taken to control it. Focusing upon RCC porcupines was one such initiative and the year the construction of RCC porcupines for 62 different parts of the area and a total amount of Rs.615.98 lakhs was spent for its execution.

The Department's efforts to control the flood and erosion have shown positive results although it is in a pretty nascent stage and needs further nurturing.

Sunil Kr. Pegu

Executive Councilor

Water Resource, Market & Fair

Flood and River Bank erosion are major problem of MAC area. It is a relentless fight year after year to contain erosion by construting RCC Porcupine, Bamboo and Boulder structure

Sports & Youth Welfare

Introduction

Sports have always played a vital role for the well being of the society, especially the youth. It encourages everyone to stay healthy and fit and fine. Sports activities help in physical and mental growth of the youth and bring in discipline to their lives. The council knows that its' youth are the future and thus for the development of sports in the MAC area. An amount of Rs. 228.70 lakhs was allotted to the department against which 30 numbers of schemes could be executed. There was no procurement this year.

Land/Playground Development

Infrastructure development was the prime objective of the schemes of the council during 2016-17 and the Department of Sports and Youth Welfare was

no different. Our country lacks tremendously when it comes to facilities to our youth in the field of sports. The council, taking this fact into consideration, took up twenty schemes of developing playgrounds in various places so that the school going kids as well as the

Construction of boundary wall and land development of Mohonpur Tulungsi Club campus (Sanjari Nwngwr)

professionals get ample space for practising and learning. More than Rs.150.00 lakhs was spent during it.

Other Schemes

Two of the other major remarkable schemes were more about promoting and motivating the sportspersons of the region. An amount of Rs.26.20 lakhs was spent in giving financial incentives to players doing exceptionally well in district, state or national level tournaments. Moreover, Rs.25.00 lakhs were spent for organising various sports events in the region. This also includes training and coaching of talented kids in various sports.

Prabhat Basumary

Prabhat Basumary
Executive Councilor
Irrigation, Sports & Youth Welfare

- 23 Nos. of playgrounds in different educational institutions have been developed with an expenditure of Rs. 163.00 lakhs
- Financial Incentives have been given to 170 numbers of talented players showing excellence at district, state and national levels of competitions

Land & Land Revenue

Introduction

The department of Land Development saw an allocation of Rs. 201.50 Lakhs during the year 2016-17 and a total of 38 nos. of scheme were executed by the department during this period. The department mostly focused upon earth filling and land development works this year.

Land Development/Earth Filling Works

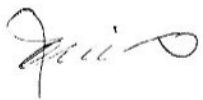

As many as 36 numbers of earth filling/land development schemes were

executed during the year and the department spent an amount of 151.50 lakhs during the execution process. The earth filling mostly helps in preventing water logging during the monsoon.

Other Schemes

The other two schemes executed mostly dealt with providing financial and other support to the ones affected by major natural disasters. Rs. 5.00 lakhs was spent against payment of ex gratia to families of persons killed or died due to natural calamity or any other natural death. Another amount of Rs. 45.00 lakhs was spent on relief and rehabilitation of victims of flood and other natural calamities.

Sukreswar Goyari

Dy. Chief Executive Councilor
WPT & BC, Soil Conservation, L&LR

- 2550 numbers of flood victims have been given relief during the flood
- 22 numbers of families have been given ex-gratia for unnatural death of the bread earner
- 36 Nos. of schemes of land development have been executed in different community institution campus with an expenditure of Rs. 144.50 Lakhs

Tourism

Introduction

The tourism sector is one of the fastest growing industries in the world right now. The contribution of the service sector to the GDP increasing exponentially is a nice example of the growing prospects of the tourism industry. It can generate both direct as well as indirect employment and with present job market getting saturated, these actually are the sectors which can really be used to the fullest for employment generation.

The Mising Autonomous Council (MAC) area is a place with rich ecological diversity of flora and fauna.

The green scenic flood plains and the blue hills from the adjoining Arunachal add to its beauty. MAC is gifted with three National Parks Kaziranga, Nameri and Dibru Saikhowa located in its fringe areas and of course the world famous river island of Majuli with its unique cultural heritage.

The missing tribe along with other indigenous tribes from its areas is in itself very rich when it comes to traditions and cultures. Mising ethnic food is extremely delicious. Mising traditional attires and designs have

already made a name for it. The folk music and dance of the communities and the tribes over here are being loved by everyone. However, despite of such huge potentials, the sector is yet to take off in its areas. This is largely because of the lack of professionalism and infra structural facilities in these areas.

An amount of Rs. 175.70 lakhs was allocated to the department for the year 2016-17 against its proposed schemes.

Construction Schemes

Like the other departments of the council, the department of Tourism too focussed mainly upon

- 3 major schemes namely – Construction of Tourist Lodges at Sadiya, Lakhimpur and Bokakhat started. These are targeted for completion during 2017-18
- Subansiri Eco Camp
- Kaziranga Eco Camp under construction

infrastructure development. All the eight schemes undertaken by the department were of construction nature. The council focussed on developing IBs, tourist lodges and guest houses. Grant-in-aid of Rs.9.99 lakhs was given to Kaziranga Charoh-Teliabari Ecotourism Society for Completion of Eco Camp.

PBM
Prasanta Bori
Executive Councilor
i/c Cultural Affairs, Tourism

Transport

Introduction

The department of Transport in the Mising Autonomous Council is authorised to look after the river transportation only and not road transportation. Thus the focus of the department is entirely on improving the river transportation system in its areas as it looks after both the Ghats as well as the boats used for transportation. Being situated in the riverine areas of Brahmaputra and Subansiri, and also filled with numerous other small rivers and tributaries, water transportation itself become very important in these

- 18 Nos. of country boat have been provided in different locations for ferrying people
- 10 Nos. of Passenger Waiting Sheds have been constructed

areas. River transportation is one of the most cost effective transportation systems. But Assam till now has not been able to use it efficiently enough. The steps taken by the council can therefore become crucial if the river transportation can be made popular in these areas.

An amount of Rs.76.00 lakhs was allocated to the department and as proposed earlier, the department utilized the funds in executing two major schemes during the year.

Schemes

A total of 18 numbers of country boats were purchased for Rs.36.00 lakhs. The objective was to provide these boats at various ghats for public transports. Moreover, the department constructed 10 passenger waiting sheds too at the cost of Rs.4.00 lakhs each.

Nilo Kanta Doley
i/c Executive Councilor
Cooperation & Transport

Health & Family Welfare

Introduction:

Like most of the rural areas of the country, health service sector in MAC area is far from being okay and there is a significant gap in nutrition levels amongst the rural population of remote areas. Thus it is important to build proper infrastructure in order to improve the scenario and provide proper services to the rural masses. The basic objective of the schemes/works under Health & Family Welfare department of MAC is to fill up the gaps in NRHM works. Like the previous year, this year too, the focus was being given to infrastructural works.

The Department of Health & Family Welfare was allotted an amount of Rs. 129.50 lakhs for execution of 12 numbers of different schemes.

Procurement

There was procurement of 10,000 units of mosquito nets for distribution among BPL families and an amount of Rs.40.00 lakhs was spent during this procurement.

Construction/Renovation Schemes:

Out of the 12 executed schemes, 11 were of construction/renovation type. And a total of Rs.104.50 lakhs was spent for the same during the year. All of these

schemes were basically related to infrastructure development of health facility centres be it a PHC or CHC or a Health Sub-Centre.

Financial assistance to critically ill patients:

Considering the financial hardship faced by families of critically ill patients, the Council spent an amount of Rs. 25.00 lakhs for giving financial assistance to such patients. Critically ill patient is defined as one having

- (1) Malignant disease (Cancer)
- (2) Kidney Transplantation,
- (3) Brain or spinal Surgery,
- (4) Heart Surgery and
- (5) Any critical child disease.

Normal medical conditions like pregnancy or general diseases including general surgery and mental illness do not qualify for any assistance under this scheme.

An apex level committee scrutinizes the applications and selects the beneficiaries.

- Infrastructure of 10 Nos. of PHCs have been improved with an expenditure of Rs. 64.50 lakhs
- 10000 mosquito nets distributed in Malaria endemic areas
- 244 numbers of critically ill patients have been given financial assistance with a total expenditure of Rs. 25.00 lakh

Welfare of Plain Tribes and Backward Classes

- 23 Nos. of Educational Institutions have been provided fund for infrastructure development (Rs. 99.58 lakhs)
- 27 Nos. of culverts constructed with an expenditure of Rs. 136.54 lakhs

Introduction

The department Welfare of Plain Tribes and Backward Classes (WPTBC) is a department which works purely in tandem with other departments of the council and enjoys the luxury of working in various sectors starting from construction related works to promotion of entrepreneurial activities. The department has the authority to take up any scheme related to the welfare of the people.

A total fund of Rs.968.43 lakhs was allotted to the department of Welfare of Plain Tribes and Backward Classes (WPT & BC) and it utilized the amount against

the execution of 146 numbers of schemes. Out of it, a total of Rs.132.00 lakhs were used for procurement of 10000 units of Tarpauline for distribution amongst BPL families whereas the rest for the execution of different schemes and operational activities.

3. The beneficiary must belong to the notified village of MAC.

An Apex Level Scrutiny Committee further scrutinized the list of beneficiaries forwarded by the Gram Sabha and approved the same for distribution of the inputs.

Procurement and distribution

Tarpauline worth Rs.132.00 lakhs were procured for distributing amongst BPL families affected by natural calamities. A total of 10000 beneficiaries were selected from different constituencies.

The beneficiaries were selected on the basis of the following criteria:

1. The beneficiary must belong to BPL families.
2. The beneficiary must belong to flood or other natural calamity affected areas.

The beneficiaries were being selected from list(s) obtained from the Circle Officers and as per recommendation of General Member, MAC and PRIs.

Financial Assistance

A total of 400 numbers of farmers were given assistance of Rs.6500.00 each for rubber plantation. The council has always tried to promote alternative sources of income/cash crops etc. so that the people can get benefits from it. Also, raising of a tea nursery was done for distributing saplings to small tea growers and an amount of Rs.15.00 lakhs was spent during this.

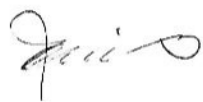

Construction of Culverts

The department took the initiative of constructing culverts at various places. During this, the department worked in tandem with the departments of PWD, P&RD and Water Resource departments. Around 27 numbers of culverts were constructed and around Rs.136.54 lakhs was spent.

Road Construction/Renovation

A total of 51 numbers of rural roads were constructed / improved during the year at an expense of

Rs.224.00 lakhs. During this, the department worked in tandem with the departments of PWD, P&RD and Water Resource departments. This enabled the council to further strengthen its operations in infrastructure development.

Sukreswar Goyari
Dy. Chief Executive Councilor
WPT & BC,
Soil Conservation, L&LR

- 9 Nos. of graveyards developed with a total expenditure of Rs. 76.20 lakh
- 33 Nos. of ethnic community based organisations have been provided a total sum of Rs. 251.11 lakhs for infrastructure development
- 52 Nos. of rural roads have been improved with an expenditure of Rs. 229.00 lakhs
- 438 numbers of unemployed youths have been provided with Rubber and Tea saplings for plantation

DEPARTMENT

Market and Fair

Introduction:

Rural weekly markets or bazaar, popularly known as haat in local language, are the hub of rural business. From groceries to cosmetics, from agro products to daily used items, these Haats serve every need of our rural population. More interestingly, these small weekly markets are even more important for our farmers. Farmers not only buy their requirements from vendors in these markets; but also sell their agro products to wholesale buyers. These weekly markets

mostly aren't built well enough and only have thatched sheds where the vendors sit. People face great difficulties, especially during monsoons and stormy weather. These markets are also a source of revenue for the government.

A total of Rs. 156.80 lakhs were allotted to the department to fulfil its objectives through its departmental schemes.

Schemes:

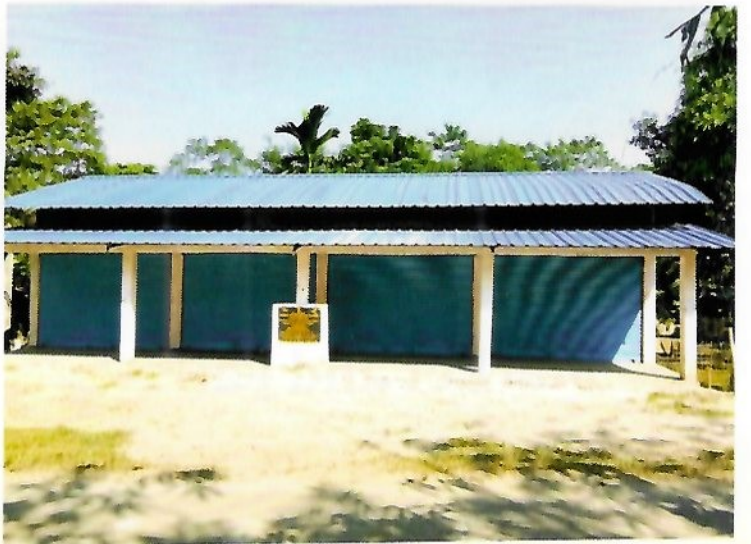

14 numbers of market sheds were constructed at

market places, each one costing 6.20 lakhs of rupees where as 14 numbers of hygienic meat market sheds were also constructed for Rs. 3.00 lakhs each. Moreover two more market sheds were also constructed at Simen Chapori and Bodoti Jamuguri. Two other schemes of earth filling activities were also executed by the department.

Sunil Kr. Pegu
Executive Councilor
i/c Water Resource, Market & Fair

- 32 Nos. of Market Sheds have been constructed with an expenditure of Rs. 156.80 lakhs.

CML-TATA Trusts & MAC collaborative Project

Short Report

Project Name: CML-TATA Trusts and MAC Collaborative multi theme livelihood initiative in MAC areas of Assam

Reporting Period: April- September 2017-18 (Half yearly report)

Theme: Natural resource management and rural livelihoods,

Partner: Tata Trusts, CML and MAC,

Project Period and duration: 2015-16 to 2018-19 (36 Months), PIA: CML

Overall Project budget (In Lakh): INR 1316.77

- ♦ TATA TRUSTS- INR 519.77
- ♦ MAC- INR 312.81
- ♦ Assam Govt.- INR 195.48
- ♦ Beneficiary- INR 288.09

1. Project Synopsis:

This is a multi thematic livelihood collaborative project of “CML-TATA TRUSTS & Mising Autonomous Council (MAC) that has been implemented in the MAC area of Assam. The project is promoting handloom, fishery and boro paddy based livelihood activities to address core and immediate food security issues and cash incomes with the available resources, opportunities on cluster approach. The operational districts are Dhemaji, Lakhimpur, Golaghat and Majuli. It has been envisaged to promote handloom activity

through skill up-gradation of the existing weavers, assured boro paddy cultivation through SRI techniques and technologies and fish rearing with the intervention in the major value chain components. At the end of the project period, the project will promote one community managed apex level Producers’ Company covering both Fishery as well as Handloom with the membership of 450 trained and skilled fish farmer and 450 skill upgraded handloom

weavers. Besides, over 7500 farmers will be trained enough to cultivate SRI techniques led boro paddy. Promotion of community based organization (CBP) is being done as a part of the implementation strategy as well as to take forward the activities on sustainable way. During the reporting period, total outreach of the project was 7240 households who participated in the activities spread over 330 hamlets of 87 villages in 4 districts of Assam.

Project Objectives & Components:

Social mobilization:

- ♦ To conduct a sustained campaign about the possibilities of change with change of attitude, practice, capacity building, technology adoption and getting organized,
- ♦ To develop 3 weaving clusters (150 in each cluster) & 3 fishery clusters (150 in each),
- ♦ To promote SRI Boro paddy with an coverage area of 1000 Ha,
- ♦ To organize weavers and fish farmers at village level Activity group and Producers' Group at cluster,
- ♦ To organize weavers in an Apex Level Weavers' Producers' Group and fish farmers into an Apex Level Farmers' Producers' Group,

Capacity building:

- ♦ To impart skill up-gradation training of 450 women weavers, skill development of 450 fish farmers on composite fish farming, field based handhold training to 7500 Boro paddy farmers,
- ♦ To promote and groom 67 community resource persons for promotion of handloom, Fishery and boro paddy,
- ♦ To provide exposure of farmers to successful stories of similar cluster developed.

Technology development:

- ♦ Infusion of appropriate technology.
- ♦ To upgrade improved wooden-frame fly-shuttle Sleys to weavers to modify their looms.
- ♦ To promote community manage irrigation system for boro paddy cultivation.

Common Facility Centre (CFC):

- ♦ To establish 3 Common Facility Centres with provision for training cum office and Yarn bank facility in each Handloom clusters,
- ♦ To establish 3 Common Facility centres with training hall cum office and godown in each Fishery clusters.

Product Development in handloom:

- ♦ Design development and Product diversifications.

Market promotion:

- ♦ To sponsor individual, AGs and Producer Groups' for participation in Handloom and other Fairs.
- ♦ To hold Special handloom fairs at State and national level
- ♦ To organize buyer-seller meet for handloom products.

2. Progress highlight in the reporting period**A. Overall Outreach**

Broad areas	Activity /output Indicators	Unit	Overall Target	Cum Achievement
Geographic Outreach	District	No.	4	4
	Block	No.	15	15
	Village	No.	82	102
Institutional Outreach	VO / Clusters	No.	13	14
	Producers' Group	No	6	6
	Apex body , Register	No.	1	0
Social Capital promotion	CRPs	No.	60	65
	Entrepreneur promotion	No.	30	17

B. Overall Activity Outreach (Plan Vs Achievement)

Broad areas	Activity /output Indicators	Unit	Overall Target	Cum Achievement
Boro Paddy	Village Coverage	No.	62	89
	HHs coverage	HH	7500	9398
	Area Coverage	Ha	1000	984
Fishery	Village Coverage	No.	10	9
	HHs coverage	HH	480	525
	Area Coverage	Ha	64	51.2
Handloom	Village coverage	No	10	17
	HHs in handloom activity	HH	450	450
	HHs in Active production	HH	450	225

C. Thematic achievement:

a. Handloom

Total 450 women were given weavers' skill up gradation training in batches of 25. Weavers under each batch were given 60 days of training on use and practice of fly shuttle loom in place of traditional through shuttle loom to increase their production efficiency. In addition, the training covers other areas like design development, practice of design weaving, product diversification, entrepreneurship development and marketing, enhanced skill of managerial skill and documentation etc. Till date total 300 trained weavers were provided with material assistance for shed construction and also with loom accessories. In addition, total 450 weavers have supported with 9 lakhs of revolving fund as working capital through this project

Total 3 producers' group and 36 Activity groups have also promoted during the project period with the vision of sustainability of production and marketing in long run. Registration of a producers' company is also under process to reach the goal envisaged.

Major highlights:

- 450 weavers are capable of weaving in fly shuttle loom
- 225 weavers have started weaving in their own fly shuttle loom
- Production efficiency has increased by 250-300% (up to 1.5 inch/minute in place of 0.5 inch earlier)
- Average net monthly income of weavers have increased to INR 3755 from INR 1200-1500 (On the basis of income data of 107 weavers)
- 45 advance weavers are ready who can assist master trainers in similar training
- 15 Community resource persons developed

b. Fishery

In fishery, 527 farmers from 26 activity groups were trained for composite fish farming in 3 fishery clusters under the project. Out of these 527 trained farmers, 349 farmers have started composite fish farming during last 1.5 years. These 349 farmers, in addition to a grant support for pond development, total 38 lakhs of rupees have given as revolving fund to use it as working capital for fish farming. All the farmers have given exposure to the advance fish farms in the state to strengthen their knowledge and believe towards the activity as a primary

livelihood.

To minimize the difficulty regarding availability of quality fish seed, 17 farmers were also promoted as fish seed farmer (nursery farmers) in 2 of the clusters. The nursery farmers were given 2 days residential training on handling, feeding and other management practices of fish seed rearing in Pavoi Green Farm at Biswanath Chariali. Out of the total nursery farmers, 4 farmers have already produced 1,33,000 fingerling in August 2017. Now, 17 farmers are growing 6 lakhs of fry to sell it as yearling in the coming season. Total estimated cost of production will come around 4 Lakhs till the end. And the farmers are expecting a total production of 3 lakhs of yearling which will be sold @ Rs. 3 per piece. So, the expected sale is 9 lakhs with a net profit of 5 lakhs within 9 months. In addition to profit, quality yearling will be available to farmers locally at reasonable price.

Major Highlights:

- 525 Trained Fishers (Composite fish culture + Tank based local fish rearing)
- Composite Fish culture in 46.5 Ha (349 Bigha)
- Average production per Ha increased to 1.8 MT from 0.7 MT (Increased to 240 Kg from 93 Kg per bigha)
- Average per hectore net income increased to INR1,87,000 from INR 74625 (Increased to INR 25000 from just INR 9950 per bigha)
- Additional income per HH from the intervention was INR 23,314 in 2017
- 17 nursery farmers developed who is producing 6 lakhs of yearling to support the Group members
- 15 Community resource persons developed

c. Boro Paddy

In case of boro paddy, the project has achieved a fantastic result both in terms of production and technology infusion. During the reporting period the team worked with 9398 farmers from 89 villages of 4 districts of Assam under boro paddy theme of the project. Total

894 hectares were already covered under the program during 2017-18 and process has already started for additional 3900 hectares in this year. Our main interventions were SRI, short duration variety, assured irrigation, use of cono weeder and organic practice of cultivation. For all the steps to ensure 37 CRPs have groomed who are giving constant handholding support to the farmers it being a new practice for them.

Introduction of short duration variety and organic practice of disease and pest control showed a revolutionary impact leading to a drastic change in practice and acceptance towards the same. The introduction of

short duration paddy variety “Naveen” paved the way for summer paddy cultivation without risk of early flood. Naveen being a short duration variety of 120 days 90% farmers could successfully harvest their paddy before early (pre monsoon) flood in May. And skill up gradation around ITK and preparation of organic nutrient as well as pesticide from locally available material made paddy cultivation a very low cost practice and environment friendly. Specially, these two interventions along with the others mentioned earlier have established Boro paddy cultivation through SRI as a best suited practice in the flood prone area. For the purpose of horizontal extension of the activity, more than 600 advance farmers from nearby area were given exposure to the activity. A paddy harvest festival was also organized Majuli to sensitise the local leaders and advance farmers so that support can be drawn in faster expansion of the activity even beyond project target. Audio-visual media of Assam also supported the activity by broadcasting the program in 4 regional news channels.

The 30% sample data of harvest collected from all the locations showed 200-250% increase in production. Average yield of paddy per hectare increased from 3 tons 7 tons through this intervention. Additionally, spill over effect of our varietal intervention was also could notice during kharif. The variety Naveen is not only of short duration but also photo insensitive (can be grown throughout the year without any affect of day length and temperature). This benefit of the variety was tried to use by farmers when flood damaged their kharif paddy in July. The farmers used the variety for re-transplantation in August in most flood damaged Majuli and Lakhimpur district of Assam.

Major highlights:

- Average production increased from 3 tons/ ha to 7 tons/ha , which is 233% to the earlier
- Total production increased by 3576 MT from an area of 894 Ha
- Naveen, as a short duration variety has got wide acceptability and the farmers also have started using it during kharif season
- 80% farmers have started using homemade organic nutrient and pesticide on regular basis.
- 37 advance farmers have developed as local resource person

3. Financial Achievement

Funding mix (In Lakhs)					
	Financial Target	Released/mobilized as on 31st January 2018	Utilization	% utilized from the released	% utilized from the Total
Funding from Tata Trusts	519.16	322.19	320.48	99.35%	61.73%
Funding from community based contribution	288.09	291.51	291.51	100%	101.19%
Funding from MAC & Govt.	508.29	427.07	427.07	100%	84.02%
Total	1315.54	1040.77	1039.06	99.83%	78.98%

4. PILOTS AND INNOVATIONS

a. Pilots and other innovations under agriculture

Other than paddy, vegetable under rain shelter and introduction of portable sprinkler irrigation system were two piloting under agriculture during the reporting period.

Due to high rainfall during kharif, no farmer goes for vegetable cultivation in the area during the season. So, during July last, we introduced vegetable cultivation under low cost bamboo framed polythene shed of 60 sq. meters. 30 farmers were trained and given required support for cultivation of high value vegetable under rain shelter.

Farmers believed on us and started growing tomato, egg plant, cauliflower, chilli and leafy vegetable under rain shelter. Now they are selling the vegetables at premium price as there is no local vegetable in the markets at present.

We also have introduced portable sprinkler irrigation system in 3 hectors of area on pilot basis during September. The objective of the piloting is to grow vegetable, oilseed and pulse during winter with minimum irrigation and the same plot can be used for growing summer paddy from January.

b. Pilots and other innovations under fishery

Opportunities around integration of other activities with fishery were also explored to a great extent during the period. Horticulture in pond bund, piggery and duck rearing are some of the activities identified as potential activities

for integration with fishery. Horticulture in pond bund has already started with 40 farmers in 2 of the clusters and farmer selection for duck rearing is also in progress. Along with horticulture in pond embankment, each farmer has also constructed 1 vermi compost unit of 3.5 cubic meters to get sufficient vermin compost to meet the nutritional need of the plants. Under horticulture, the farmers are growing lemon, papaya and seasonal vegetable in a scientific manner. In addition to the above mentioned activities, tank based cat fish (Magur) and Kawoi rearing has also taken up with 15 farmers on pilot basis. For the same, a 3 days training program, under the facilitation of fishery scientist, Dr. A.K. Sahu, was also arranged during last May.

The farmers are growing 500 Magur and 100 Kawoi in each tank of 10 cubic meters. The expected income from each tank with 600 fish is Rs. 15000 in 1 year.

Pilots and other innovations under handloom

In addition, the project team has also promoted Eri, Mulberry and Keseru plantation on pilot basis with 243 members of the 3 handloom clusters to encourage production of silk like eri and mulberry in the area. This activity will not only add value to the livelihood of the families but also help them to produce raw material for their own weaving unit.

5. Best practices:

- All the farmers prepared and used homemade organic fertilizer and pesticide in paddy and vegetable.
- 90% paddy farmer harvested paddy timely before flood came because of a short duration variety –Naveen.
- 30% demand met due to fish seed production in one of the cluster.
- Weavers trained on using organic dye in the yarn with the locally available herbs, flowers and fruits.
- Local fish rearing in 7.75 Cubic meter tank- 500 magur and 100 Kawoi
